## 1.2 Purpose-specific services

Purpose-specific services are services that do not provide a regular timetable service between 7 am and 7 pm. They include schools' services, worker services, after midnight services, on demand or dial-a-ride services and services for special events (e.g. race and show days). Purpose-specific services will not necessarily run through key interchange points.

#### 1.4 Total Mobility

Total mobility services are a means whereby subsidised transport is provided for those with impaired mobility who have difficulty with, or are unable to use, scheduled public passenger transport services.

Environment Canterbury currently runs schemes in Christchurch, Timaru, Ashburton and Waimate whereby local taxi companies are contracted to provide subsidised fares using a voucher system. The schemes also provide financial assistance to operators for the purchase of vehicles and equipment to meet the communities' needs.

Environment Canterbury also provides grant funding contributions to supports Trusts in Geraldine and North Canterbury that cater for the needs of the mobility impaired in these areas.

#### 1.5 Trial services

A trial service is one undertaken for periods of between six months and 18 months. Trial services explore innovative ideas and may be used to test demand.

Dial a ride services may be considered where they would provide better value for money than 'conventional' (fixed route) services.
